

PPAR RECEPTOR ACTIVATOR COMPOUNDS FOR TREATING CUTANEOUS DISORDERS/AFFLICTIONS

5

ABSTRACT OF THE DISCLOSURE

Compounds of formula (I):

- 10 characteristically activators of receptors of PPAR type, are well suited for treating cutaneous disorders/afflictions, notably disorders of the barrier function of the skin, more particularly disorders of the secretion of epidermal lipids, photodermatoses or ulcers, and/or disorders of the metabolism of lipids.
